

## **Pan-United recognised for industry-leading environmental stewardship at the Singapore Environmental Achievement Awards 2017**

**Caption:** Mr Ken Loh (second from left), Executive Director of PanU Concrete, receiving the award from Mr Masagos Zulkifli, Minister for the Environment and Water Resources.

**SINGAPORE, 13 OCTOBER 2017** – Pan-United Corporation Ltd (“PanU”, “泛联集团” or the “Group”) is proud to announce that its wholly owned subsidiary, Pan-United Concrete Pte Ltd (“PanU Concrete”), has been conferred a premier award for environmental sustainability.

The *SEC-SETSCO Singapore Environmental Achievement Award (Manufacturing) 2017* was presented to PanU Concrete by Guest-of-Honour Mr Masagos Zulkifli, Minister for the Environment and Water Resources, at the 20<sup>th</sup> Singapore Environmental Achievement Awards (SEAA) Ceremony this afternoon.

Mr Ken Loh, Executive Director of PanU Concrete, said: “We are honoured to receive this prestigious award from the Singapore Environment Council. It encourages and motivates us

even more in our commitment to conserving the environment through our processes, products and instilling a culture of sustainability among our people.

“Sustaining the environment has been an integral part of our business model since we began our concrete business in 1999. It is reflected in the way our organisation is structured. We continually seek to raise the industry bar in ‘greening’ our business. Technology has become a crucial tool in the entire value chain of works.”

PanU is also the first ready mixed concrete company to achieve the Singapore Green Building Council’s “Leader” 4-ticks certification.

### **ABOUT THE AWARDS**

**[www.sec.org.sg/seaa/about-seaa.php](http://www.sec.org.sg/seaa/about-seaa.php)**

Organised by the Singapore Environment Council (SEC), the Singapore Environmental Achievement Awards (SEAA) is one of the most prestigious environmental awards in Singapore and the region. It was launched in 1997 to recognise overall environmental stewardship by organisations. The criteria for the SEAA focuses on assessing the leadership displayed by the company, the real environmental improvements made, as well as the ability of an organisation to establish procedures, train staff and innovate in order to achieve breakthroughs in environmental performance. Companies that are recognised by the SEAA join an elite pool of organisations from the region that have affirmed their commitment to environmental excellence and protection of the natural environment.

### **ABOUT THE PAN-UNITED GROUP**

**[panunited.com.sg](http://panunited.com.sg)**

Pan-United Corporation Ltd (“PanU”, “泛联集团” or the “Group”) is an Asian multinational corporation focused on two core businesses - Concrete & Cement (C&C) and Ports. Its operations span five countries employing a workforce of more than 1,600 people. Trusted for consistently delivering quality products and reliable services to customers for over 50 years, PanU thrives on innovation, operational excellence and long-termism.

### **Concrete & Cement**

PanU is Singapore’s largest supplier of ready mixed concrete (“RMC”) with a 40% share of the market. It is also the largest local cement supplier. Its C&C businesses are vertically integrated with aggregate quarrying and logistics to maximise on the value chain. PanU’s regionalisation thrust is focussed on market expansion in Indonesia, Malaysia and Vietnam. It is committed to creating sustainable solutions for its customers. This is by way of harnessing innovation and cutting-edge technologies to develop quality concrete products that are safe and environmentally-friendly.

### **Ports**

In China, the Xinghua Port Group has built up strong trust through the provision of vital integrated logistics hub services from its deepwater port in Changshu City. Xinghua serves as the hub for key import cargoes such as pulp & paper and logs for robust domestic markets, and exports of high-value finished steel products and project equipment. Its strategic location on the Changjiang (Yangtze) River Delta is a strong competitive edge, both as an international port and as a cargo transshipment gateway for eastern and central China.
